

Lincolnshire employer ? Need the right employees to grow your business? Join the Skills Hub

The Problem:

Business, training and funding comes in different shapes and sizes that just don't connect up. So employers often struggle to find employees with the right skills, or can't access the funds or training providers to train existing employees.

The Solution:

Bring together business, training and funding in a Skills Hub, where employers work cooperatively to tell Government what support they need to develop the right skills at local level. The objective is the best skills investment possible for Lincolnshire business, so that employees are equipped with the right skills to help business grow.
